PATENT CONTROL OF CHOLESTEROL AND BLOOD GLOCOSE

NUTRACEUTICAL FLOUR

Specifically, the new flour contains phytocomplexes characterized by their significant content in β -glucans, enzymes and coenzymes of a vegetable nature.

The new nutraceutical flour, due to its β -glucan content, intervenes in the control of cholesterol and blood glucose.

The formulation includes other phytocomplexes capable of providing functional health characteristics of further bioactive enhancement of the nutraceutical formulation by intervening with the prevention and treatment of the most common metabolic imbalances.

The new flour, aimed at people suffering from hypercholesterolemia, hypertriglyceridemia and related diseases, is able to perform a significant stabilizing action on cholesterol and lipid values.
