## **PATENT CONTROL OF TYPE II DIABETES**

### **IMPROVED FLOUR AND KNEADED FOOD PRODUCT**

This new international patent, owned by the company, consists of a formulation capable of giving rise to a wide range of nutraceutical foods specifically aimed at people with type II diabetes. The foods that can be made are: flours, pasta, bread, and other baked goods.

The patented formulation contains phytocomplexes (tropical and subtropical), enzymatic groups and plant coenzymes that perform a specific action on metabolic imbalances, on the altered glycemic picture and conditions of non-insulin resistant type II diabetes, in addition to the control of blood dyslipidemias.
